

# HEAVY HANDLING

SALE AND RENTAL WORLDWIDE

## HEAVY HANDLING OF ALL WIND TURBINE COMPONENTS:

BLADE  
HUB  
NACELLE  
TOWER  
PLATES (BY USE OF MAGNETS)

Our engineering team is specialized in lifting, transportation and handling of heavy components within the wind turbine industry. We are familiar with both components and their route through production to on-site installation and maintenance.

Liftra is recognized by international wind turbine industry as a specialist in lifting and transportation solutions. We guarantee excellent engineering services in our field.

FORKLIFT handling a hub.

## COOPERATION

Liftra works together with the major suppliers of reachstackers and forklift suppliers - and design special equipment to optimize heavy handling.

REACHSTACKER handling a tower section.

RTG handling a tower section.
